

## REDDITCH ELECTRO-PLATING CO. LTD

### ENVIRONMENT MANAGEMENT POLICY STATEMENT

The Company is committed to achieving environmental best practice throughout its business wherever this is practicable. The Directors recognise that they have a duty of care for Waste Management under the Environmental Protection Act 1990 towards its employees, the general public and to the environment with regard to the control of waste.

Environmental management continues to be a company priority, fully integrated into our business. We seek to educate and train staff to act in an environmentally responsible manner.

The company is committed to minimising the impact of its operations on the environment by means of a programme of continuous improvement.

The Company shall take all such measures as are reasonable to:

- ◆ prevent anyone from dealing with their waste illegally;
- ◆ prevent the escape of waste;
- ◆ ensure waste is only transferred to an authorised person;
- ◆ ensure an accurate description of waste is provided when the waste is transferred, and a transfer note is completed;
- ◆ seek to reduce consumption of materials in all operations and reuse rather than dispose wherever possible;
- ◆ reduce the environmental impacts of the company's activities;
- ◆ make available appropriate resources to ensure the environment policy is implemented in full.

As part of our continuing drive for quality in all things we do, we have therefore developed this comprehensive policy statement which will enable us to set targets by which our efforts towards sustainable environmental improvement can be measured and monitored on a regular basis.

In this way we aim to protect the health and safety of our people and the general public whilst contributing to the future well-being of the environment.

Signed
